

OHCHR is pleased to announce the launch of the **2016** Human Rights Report Card, which will assess the human rights records of all 193 UN member states. The report card will be published in March 2016.

The report card will provide a comprehensive overview of human rights violations and trends in each country, and will also identify areas for improvement and recommend actions for governments to take.

The report card will be available in English, French, and Spanish, and will be accessible to the public through the OHCHR website.
